

## SOFTWARE ENGINEER - WEB DEVELOPER

# BRUNO AFONSO

### ABOUT ME

Hello, my name is Bruno, and I'm 30 years old. I'm a Web Developer primarily focused on Frontend development, always looking to learn more. For the past 15 years, I have also been a high-performance athlete, competing in dozens of European and World championships. Although sports and programming may seem unrelated, I believe that my most valuable skills have come from my athletic background. I am tremendously disciplined, highly focused, and always striving to improve day by day, embodying the well-known philosophy of kaizen. You can always expect great commitment and perseverance from me, always with a smile on my face.

### GENERAL

**Name :** Bruno Afonso

**Age:** 30

**Birth place:** Mértola,  
Portugal

**Address:** Soeiro Pereira  
Gomes N°18

**Zip code:** 7750-362

### EDUCATION

**University of Coimbra**

2019 – Not finished

**Master's degree on Artificial Intelligence**

Looking for knowledge, I got in a second master's degree focused on Artificial Intelligence. However, the constraints imposed by COVID-19 left me feeling unmotivated with the classes, prompting my decision to leave the course. Nevertheless, during my brief stint, I gained a basic understanding of Machine Learning concepts.

**University of Coimbra**

2016 - 2018

**Master's degree on Software Engineering**

This master's degree provided a first insight of the software development cycle, focusing on software engineering methodologies, process refinement, and requirements documentation. It also covered random topics such as security and artificial intelligence. Practically, it emphasized mastering modern programming languages and frameworks essential in today's industry. The program concluded with a hands-on project collaborating with a real company to tackle real-world challenges.

**University of Coimbra**

2012 - 2016

**Bachelor's degree on Informatics Engineering**

---

## WORK EXPERIENCE

### Aptoide - Frontend Developer

August 2021 – Present

As a Frontend Developer at Aptoide, I led the complete refactor of our Web App Store application and design system. Currently, I am responsible for maintaining the Web App Store and internal products, including a content management back office that I developed from scratch. Additionally, I create landing pages to promote the company, events, and promotions. I also facilitate effective communication between the development and marketing teams to address their needs.

My key responsibilities include developing mobile-first applications, coding responsive layouts designed in Figma, integrating frontend applications with backend internal products and tools, optimizing performance based on Google Core Web Vitals metrics, integrating marketing tools such as TikTok, Facebook, and Reddit pixels, integrating analytics tools such as Google Analytics, Indicative, and Rakam, and testing and debugging applications.

### Instituto Pedro Nunes - Backend Developer

January 2020 – September 2020

As a Backend Developer, my responsibilities were pretty similar to what I was doing in my internship which included developing and integrating various modules of a hospitality sector application. Additionally, I was tasked with understanding the context of different applications used in this sector and translating them into a cohesive data model.

My key responsibilities included developing various modules for a microservices-oriented application, integrating multiple APIs from hospitality sector apps, updating the data model used in the application, testing and debugging, and writing documentation related to the developed modules.

### Instituto Pedro Nunes - Backend Developer as Intern

January 2018 – January 2020

During my Software Engineer Master's degree, I embarked on an internship that formed the core of my thesis, culminating in its presentation. As an Intern Backend Developer, I actively participated in SCRUM and sprint meetings, contributing to the development of specific micro-services for a Hospitality Web Application.

Throughout the internship, I acquired valuable knowledge and practical experience in Ruby on Rails. Emphasizing testing with RSpec, I prioritized thorough code reviews and managed version control for my contributions. This internship provided me with crucial exposure to the business world, marking a significant milestone in my professional journey.
